NEW TREE PROTECTION & CARE PRODUCTS	
Product	Description
Max Grow Tree Tube Shelters	Protect seedling from animals, wind damage, and climate conditions. Includes pre-installed ties and netting to go over the top to protect young saplings. Flared top to protect the plant as it emerges from the tube. Cuffed bottom for added support. Vented on top to allow the plant to properly harden off or dry out in moist climates. Unvented bottom to protect seedling from chemical overspray. Designed with "Razor Line" so tube slits as tree grows. Tree stakes not included.
Tree Bark Protectors	Deer, squirrels, rabbits, and woodchucks cannot bite or rub through this rigid plastic mesh. Trees are shielded by open mesh, which prevents moisture and mildew building. Also, the protectors will not harbor insects and animals and also will not inhibit growth. These tubes are more attractive than other solutions and are designed to blend in. Flexible and easy to install.
Weed Pro Weed Block 2'x2'	Block weeds without dangerous chemicals! This mat is composed of recycled, photo-degradable plastic. Blocks the sun's rays to help prevent weed seed germination. Weed Pro lasts for up to three years and preserves moisture. Comes with four pins to secure in place
